

CLIMATE
ACTION PLAN

JOIN US...

The City of Escondido is updating its roadmap for reducing greenhouse gas emissions and protecting the environment. While Escondido plays a very small role in the global problem of climate change, we still need to reduce our carbon footprint and global impact. This roadmap, called a Climate Action Plan, will be used to guide future City decision-making.

The Climate Action Plan Update will be developed to meet state requirements while meeting our goals of maintaining community character and creating livable, sustainable neighborhoods.

We need your input to determine what types of changes are needed.

YOUR VOICE COUNTS!

You have four (4) ways to provide input during the summer.

1. **Community workshop on Monday, July 30**
Mitchell Room, Escondido City Hall
201 North Broadway, 6 - 8 PM
2. City Planning Commission meetings
3. Pop-up workshops
4. Mobile community conversations -
invite our staff to come to you!

Please refer to the project website for more information about these events.
